

# Template Week 1 – Bits & Bytes

Student number: 588734

## Assignment 1.1: Bits & Bytes intro

What are Bits & Bytes?

Bits is een 1 of een 0. En een byte zijn 8 bits.

What is a nibble?

Dat zijn 4 bits.

What relationship does a nibble have with a hexadecimal value?

1 nibbel = 1 hexidecimaal cijfers

Why is it wise to display binary data as hexadecimal values?

Het is compacter, je kan meer data kwijt in een kortere waarde.

What kind of relationship does a byte have with a hexadecimal value?

1 byte is 2 nibbels/2 hexidecimale waardes.

An IPv4 subnet is 32-bit, show with a calculation why this is the case.

Ieder vakje is 8 bits, dus 1 byte. En intotaal heb je 4 bytes, dus 32 bits.

192.168.1.1

4 x 1 byte = 4 bytes, 4 x 8bits = 32bits.

#### **Assignment 1.4: Student number to HEX and Binary**

Convert your student number to a hexadecimal number and a binary number.

Explain in detail that the calculation is correct. Use the PowerPoint slides of week 1.
